**ON IMMORALITY IN SCIENCE AND MEDICINE:
NECESSITY OF SCIENTIFIC TRIBUNALS**

Michael Ch. Michailov 1, Eva Neu 1, Thomas Plattner 1, Ursula Welscher 1, Herta Danler-Oppl 1, Tatjana Senn 1, Marie-Luise Gräfin von Brockdorff 1,2, Manfred Holler 1,3, Christoph Luetge 1,4, Michael Schratz 1,5, Germain Weber 1,6

1 Inst. Umweltmedizin c/o ICSD/IAS e.V., POB 340316, 80100 Muenchen, Germany (Int.Council Sci.Develop./ Int.Acad.Sci. Berlin-Innsbruck-Muenchen-New Delhi-Paris-Sofia-Vienna)

2 Univ. Muenchen, Fac. of Law, Muenchen, Germany

3 Univ. Hamburg, Faculty Economics (Dean), Hamburg, Germany

4 Techn. Univ., Muenchen, Inst. Ethics (Director), Muenchen, Germany

5 Univ. Innsbruck, School of Education (Dean), Innsbruck, Austria

6 Univ. Luxembourg and Vienna, Fac. Psychology (Dean), Vienna, Austria

INTRODUCTION: Enormous progress by scientific-revolutions/*Thomas Kuhn* after *Copernicus* is related to *misuse of science* causing disastrous-repercussions: health-research-ecological-other problems. **Foundation of international scientific tribunals** to universities by network of continental-national can support *scientific-regulation* in form of independent link between legal&political institutions. IVR&other philosophical&juridical organizations could play leading role in this project.

CONCEPTION:

A. Research:

a. *H.von Helmholtz* (and others) defamed the also eminent scientist *J.R.Mayer* (discovery: conservation-energy-law).

b. *German Helmholtz-Centre-München (former GSF)* deposited illegal radioactive-material (*biggest European atom-scandal* acc. to German Ex-Vice-Chancellor *S.Gabriel*), which can lead without casual analysis to water-contamination.

c. Scandal about HIV-virus-discovery: *L.Montagnier* received *Nobel-price*, but not *R.Gallo*, because of immorality!

d. *Austrian&German universities* destructed international-laboratories by totalitarian methods. *Proposal:* Transformation of GSF into German Society for Future Anthropology (GSF-A) as international research centre incl. leading role in scientific programmes&administration by IVR/FISP/German-organizations. Foundation of branches to universities, e.g. Univ. Lucerne, Munich, Innsbruck,etc.

B. Education: *German medical-faculty* declined medical dissertation (6-positive/2-negative-referees).

Proposal: Scientific tribunals which consider conflicts about academic titles.

C. Technology-Chronobiology&photobiology:

a. Summer-winter-time (difference) leads to permanent *patho-physiological-reactions* supporting diseases.

b. *New energy saving lamps* (pathogenic light-discontinuity-spectrum&possible mercury-

intoxication) induce pathophysiological reactions.

Proposal: Int. scientific tribunals which give recommendations for UNO/EU, etc. about conflicts conc. summer-winter-time/light problems.

D. Health-Medicine. Monodimensional (ultra specialization), immoral&economized medicine damages patients&state, e.g. surgical-leg-therapy: patient was pharmacological&surgically treated for 10 days: costs about 15000 Dollars. The same disease after 1-year false treatment led to invalid state (patient cannot go): costs over 0.5million Dollars for 1-year therapy!

Proposal: Scientific tribunals (not int.) which support projects about central medical-problems giving concrete-proposals for WHO/CIOMS/nat. health inst. (ministries, etc.).

CONCLUSION: *International scientific tribunals* via network of national-continental-int. ones, supported by IVR&other organizations, *giving practical scientific-political recommendations*, counteracting impossible situations (A.-D.) & supporting **UNO-Agenda21** for better education-health-ecology-economy.
